Mental health care for people of all ages.

In the 2024 Milwaukee County community health needs survey, nearly 50% of respondents named mental health as a top health need in their community—**you can help.**

Give to the Mental Health Improvement Fund

The **Mental Health Improvement Fund (MHIF)** was launched by the health system members of the Milwaukee Health Care Partnership (MHCP) and the United Way to help connect <u>people of all ages</u> with affordable **mental and behavioral health care services** that meet their needs.

Your contribution to the MHIF will support organizations in the community that provide:

- Mental health services for children, adults, and families of all ages
- Outpatient mental health services, like ongoing therapy or help with medication
- Crisis services, like same day walk-in services
- Testing or screening for conditions
- Mental health services in creative locations, like community centers or at home
- Support in helping people find and connect with the mental health services they need

The Mental Health Improvement Fund is a United Way challenge grant supported by the health system members of MHCP (Aurora Health Care, Ascension Wisconsin, Children's Wisconsin and Froedtert ThedaCare Health, Inc.).

The health systems have pledged to match your donation 6 to 1!
